<b>GSO-ECE-13H-2</b>	<b>2012</b>	<b>Motor Vehicles: Methods of Test for Braking System – Part 2: Determination of Capacity of Energy Storage Devices</b>
<b>GSO-ECE-13H-3</b>	<b>2012</b>	<b>Motor Vehicles: Methods of Test for Braking System – Part 3: Determination of Distribution of Braking among the Axles of Vehicles</b>

GSO	Year	Technical Regulation
GSO-ECE-13H-4	2012	Motor Vehicles: Methods of Test for Braking System – Part 4: Determination of Function of Anti-Lock Systems
GSO-ECE-13H-5	2012	Motor Vehicles: Methods of Test for Braking System – Part 5: Determination of Performance of Brake Lining Using Inertia Dynamometer
GSO-ECE-13H-6	2012	Motor Vehicles: Methods of Test for Braking System – Part 6: Determination of Coefficient of Adhesion

\* Applicable for certification if provided or the vehicle is designed for.

### **Compliance with National Regulations for Member Countries (Refer to the Annex):**

The manufacturers should state in GSO conformity certificate (Additional Information Item) the following:

**"Also comply with the National regulations for member countries mentioned in the Annex of the list of Technical Regulations for MV 2026 MY-D3, when exporting to those countries."**

### **Recall Campaigns:**

Recalls of Motor vehicles are required in GSO member countries. It is essential that all Motor Vehicle Manufacturers should upload all details of recalls in the Mutabiq.

### **Uploading VIN numbers:**

All motor vehicles to be exported to GSO member countries are required to upload their VIN numbers and necessary activate in Mutabiq.

### **Warranty agreement for motor vehicles in GCC countries:**

GSO would like to emphasize that all motor vehicle manufacturers should apply for the warranty agreement for all vehicles marketed in GCC countries, regardless of the importer.

### **GSO technical requirements:**

To purchase or download GSO regulations please visit GSO website: [www.gso.org.sa](http://www.gso.org.sa)

## **Implementation of Emission limits:**

### For Gasoline Engine:

- 1) The limits of pollutants emitted from motor vehicles should comply with less than Euro 4 for Bahrain.
- 2) The limits of pollutants emitted from motor vehicles should comply with Euro 4 for Qatar.
- 3) The limits of pollutants emitted from motor vehicles should comply with Euro 5 for Saudi Arabia\*, Oman and Kuwait.
- 4) The limits of pollutants emitted from motor vehicles should comply with Euro 6b for UAE\*\*.

### For Diesel Engine:

- 1) The limits of pollutants emitted from motor vehicles should comply with Euro 4 for Bahrain.
- 2) The limits of pollutants emitted from motor vehicles should comply with Euro 5 for Saudi Arabia\*, Oman, Qatar and Kuwait
- 3) The limits of pollutants emitted from motor vehicles should comply with Euro 6b for UAE\*\*.

\* For Saudi Arabia refer to annex mentioned below.

\*\* For UAE refer to annex mentioned below

## ANNEX

### National Regulations for Member Countries

#### United Arab Emirate:

- Starting from January 2026 the limits of pollutants emitted from all road motor vehicles (Gasoline Engine and Diesel Engine) should comply with Euro 6b limits.
- UAE.S 5012: 2019: Motor Vehicles – Safety Requirements for School Buses.
- UAE.S 5019: 2024: Motor Vehicle – “eCall” Emergency Calls Technical Requirements.
- UAE.S 5021: 2018: Terrestrial Radio Receiver Specifications.
- UAE.S 5041: 2020: Fire suppression systems intended for engine compartments of buses and coaches.
- All Busses with less than 22 seats should be provided with speed limiting system with maximum speed of 100 km/h, this system cannot be modified or changed by the driver.
- All the seats of passenger cars and multipurpose vehicles (Except middle rear seat) shall be towering back type or equipped with adjustable head restraints.
- The front and rear outboard seats of passenger cars and multipurpose vehicles shall be provided with three-point safety belts, the other seats and seats of all other vehicles shall be provided with either two-point or three-point safety belts.
- UAE.S 2698: 2024: Technical Requirements for Electric Vehicles. All electric vehicles sold in the UAE market must obtain an Emirates conformity certificate from Ministry of Industry and Advanced Technology (MoIAT).
- The front fog lights should be in accordance with ECE 19 or SAE J583, except the vehicles which are equipped with lighting technologies that increase the efficiency of vehicles visibility while driving in a foggy conditions (such as digital lighting and LED lamps as well as radars, infrared technologies, etc.).

### **Kingdom of Bahrain:**

#### Large Passenger Vehicles (Busses):

- 1) The minimum seat length shall be 40 cm for every passenger (For school busses 30 cm at least).
- 2) The minimum seat width shall be 40 cm for every passenger (For school busses 30 cm at least).
- 3) The corridor between the seats, rows shall not be less than 40 cm.
- 4) The height between any of the seats (top of head rest) and the ceiling of the vehicle shall not be less than 85 cm.
- 5) The space between the front of a seat and a back of the seat in front shall not be less than 30 cm.
- 6) The space between the vehicle floor and its ceiling shall not be less than 190 cm, except the vehicles designed not for passengers to stand.

**Kingdom of Saudi Arabia:**

#	SASO No.	Name of Standard
1	SASO 2946:2020 SASO 2946:2020/AMD1:20 22 SASO 2946:2020/AMD3:20 22	Buses - Requirements of Construction

\* *Applicable for certification if provided or the vehicle is designed for.*

\*\* *Not applicable for Certification.*

\*\*\* *Implementation will start on 01/01/2027 (calendar year).*

### Other Saudi national requirements related to occupant protection and environmental

#	Title of the item	Regulation No.	Title of the technical regulations	Target category of vehicles	Remarks
1	Allowable limits of pollutants emitted from motor vehicles	ECE 49	Uniform provisions concerning the measures to be taken against the emission of gaseous and particulate pollutants from compressing ignition Engines and positive ignitions engines for use in vehicles	Heavy Duty	Diesel engine should comply with Euro V
		ECE 83	Uniform provisions concerning the approval of vehicles with regard to the emission of pollutants according to engine fuel requirements	Light Duty	Diesel/Gasoline engine should comply with Euro 5
2	Child restraint systems	ECE 44	Uniform provisions concerning the approval of restraining devices for child occupants of power-driven vehicles (Child Restraint System)	Passenger car and Multipurpose passenger	
		ECE 129	Uniform provisions concerning the approval of Enhanced Child Restraint Systems (ECRS) used on board of motor vehicles		
3	ISOFIX anchorages systems	ECE 145	Uniform provisions concerning the approval of vehicles with regard to ISOFIX anchorage systems ISOFIX top tether anchorages and iSize seating positions		
4	Safety-belt anchorages	ECE 14	Uniform provisions concerning the approval of vehicles with regard to safety-belt anchorages	Passenger car, Multipurpose passenger vehicle, Bus, and Truck
