

Quality Policy

The GCC Standardization Organization (GSO) aims to unify the various standardization activities in the GSO Member States and follow up on their implementation in coordination with Member States. GSO confirms its commitment to implementing a quality management system in accordance with ISO 9001:2015 requirements.

In order to achieve its vision of being the trusted regional center of excellence for standardization activities and the first enabler of the GCC Common Market, GSO will focus on customers and meeting their needs and expectations. This will lead to continuous improvement in the services and products provided by GSO.

GSO also states that the quality policy will be one of the basic frameworks for defining the periodic goals of quality within the fundamental pillars of the strategic plan, which are:

1- Institutional excellence to provide added value to member states.

2- Promoting economic integration among member states to achieve the Gulf common market.

3- Building effective strategic partnerships as a pioneer regional authority.

To this end, the quality management system will be reviewed periodically to meet the requirements.

GSO President
